

**AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claim 1 (currently amended): A computer implemented method of categorizing a network page, comprising:

providing a list of categories, wherein said list of categories include a category for transacting business and a category for providing information, and wherein said list of categories include a [[plurality of categories]] category based on [[the]] copyright status of material on a page; [[and]]

assigning said network page to one or more of said list of categories[.];

providing a categorization label for the network page using the copyright status of material on the network page; and

controlling usage of the network page using the categorization label and the copyright status of the network page.

Claim 2 (canceled).

Claim 3 (original): The method of Claim 1, wherein said categories include a plurality of categories based on subject matter.

Claim 4 (previously presented): The method of Claim 3, wherein said categories comprise categories related to government, medical, education and social science, news, sports and recreation, history, science and technology, arts and humanities, finance and business, reference, and explicit.

Claim 5 (original): The method of Claim 1, wherein said categories include a plurality of categories based on the type of files associated with a page.

Claim 6 (original): The method of Claim 5, wherein said categories comprise visual, audio, multimedia, text-only, and communication.

Claim 7 (cancelled).

Claim 8 (previously presented): The method of Claim 1, wherein said plurality of categories based on the copyright status of material on a page comprise categories related to public domain, fair use only, use with attribution, and permission of copyright owner needed.

Claim 9 (previously presented): The method of Claim 1, wherein said categories include:  
a plurality of categories based on subject matter.

Claim 10 (previously presented): The method of Claim 1, wherein said categories include:  
a plurality of categories based on the type of files associated with a page.

Claim 11 (previously presented): The method of Claim 1, wherein said categories include:  
a plurality of categories based on the copyright status of the material on a page.

Claim 12 (previously presented): The method of Claim 1, wherein said categories include:  
a plurality of categories based on subject matter; and  
a plurality of categories based on the copyright status of the material on a page.

Claim 13 (previously presented): The method of Claim 1, wherein said categories include:  
a plurality of categories based on subject matter; and  
a plurality of categories based on the type of files associated with a page.

Claim 14 (previously presented): The method of Claim 1, wherein said categories include:  
a plurality of categories based on subject matter; and  
a plurality of categories based on the copyright status of the material on a page.

Claim 15 (previously presented): The method of Claim 1, wherein said categories include:

- a plurality of categories based on subject matter;
- a plurality of categories based on the type of files associated with a page; and
- a plurality of categories based on the copyright status of the material on a page.

Claim 16 (previously presented): The method of Claim 1, wherein said categories include:

- a plurality of categories based on the type of files associated with a page; and
- a plurality of categories based on the copyright status of the material on a page.

Claim 17 (previously presented): The method of Claim 1, wherein said categories include:

- a plurality of categories based on subject matter;
- a plurality of categories based on the type of files associated with a page;
- and
- a plurality of categories based on the copyright status of the material on a page.

Claim 18 (previously presented): The method of Claim 1, further comprising providing an indicium for each of said categories.

Claim 19 (original): The method of Claim 18, wherein said indicium comprises an icon.

Claim 20 (original): The method of Claim 18, wherein said indicium comprises two letters.

Claim 21 (currently amended): The method of Claim 1, further comprising providing a categorization code that can be used to label the page with the categorization label that indicates the categories to which the page is assigned.

Claim 22 (original): The method of Claim 21, wherein said categorization code comprises an indicium for each of said categories.

Claim 23 (original): The method of Claim 22, wherein said indicium comprises two letters.

Claim 24 (original): The method of Claim 22, wherein said categorization label includes the indicia for each category to which a page is assigned.

Claim 25 (original): The method of Claim 21, wherein said categorization label denotes the level of importance of the categories to which a page is assigned.

Claim 26 (original): The method of Claim 25, wherein said categorization label is recognizable by a search engine.

Claim 27 (original): The method of Claim 21, wherein said categorization label further includes an identifier to indicate that said label is part of said categorization code.

Claim 28 (original): The method of Claim 21, wherein said categorization label can be made to apply to an entire Web site.

Claim 29 (previously presented): The method of Claim 21, further comprising making said categorization label recognizable by a search engine.

Claim 30 (previously presented): The method of Claim 1, further comprising making said categories to which a page is assigned recognizable by a search engine.

Claim 31 (original): The method of Claim 1, wherein said list of categories is provided on a graphical user interface.

Claim 32 (currently amended): A computer implemented method for categorizing a network page, comprising:

[[a.]] providing a list of categories, wherein said list of categories include a category for transacting business and a category for providing information, and wherein said list of categories include a plurality of categories based on the copyright status of material on a page; [[and]]

[[b.]] providing a categorization code for labeling the network page with a categorization label, wherein said categorization label indicates a set of categories and subcategories to which the network page is assigned[[.]], and wherein said categorization label indicates the copyright status of material on the network page; and

controlling usage of the network page using the categorization label and the copyright status of the network page.

Claims 33 - 50 (canceled).

Claim 51 (Currently amended): A computer implemented method of categorizing a network page, comprising:

providing a list of categories, wherein said categories include a [[plurality of categories]] category based on the copyright status of material on a page, and wherein the copyright status comprises categories related to public domain, fair use only, use with attribution, and permission of copyright owner needed; [[and]]

assigning said network page to one or more of a plurality of said list of categories[[.]];

providing a categorization label for the network page using the copyright status of material on the network page; and

controlling usage of the network page using the categorization label and the copyright status of the network page.
